

Sakib Malik

Python Developer

maliksakib347@gmail.com • +91 8954664647 • Mohali, India • linkedin.com/in/sakib-malik • sakibmalik.vercel.app

PROFESSIONAL SUMMARY

Python Developer with 4+ years of experience building production-grade web applications, REST APIs, and AI-powered solutions. Strong experience with Python, Django, Django REST Framework, FastAPI, LangChain, OpenAI APIs, RAG pipelines, vector search, and LLM-based chatbots. Experienced in backend architecture, asynchronous processing, database design, Dockerized deployments, and AWS infrastructure. Skilled in integrating AI capabilities into scalable full-stack applications.

SKILLS

Languages: Python, JavaScript, TypeScript, HTML, CSS

Backend: Django, Django REST Framework (DRF), FastAPI, REST APIs, WebSockets

AI / LLM: LangChain, OpenAI APIs, Google Gemini, RAG, LLM Integration, Prompt Engineering, Embeddings, Vector Search, AI Chatbots, AI Agents

Frontend: React.js, Next.js, Vue.js, Nuxt.js

Databases: PostgreSQL, MySQL, MongoDB, Redis

Async / Processing: Celery

Cloud & DevOps: AWS EC2, AWS S3, Docker, Nginx, Linux, Kubernetes

Tools: Git, GitHub, Postman, VS Code

EXPERIENCE

Python Developer | [Wisdom InfoSoft, Mohali](#) | *June 2022 – Present*

- Developed production-grade web applications and REST APIs using Python, Django, and Django REST Framework.
- Designed and integrated AI/LLM features including conversational chatbots, RAG pipelines, and OpenAI-powered workflows.
- Built backend APIs consumed by modern frontend applications using Nuxt.js and React.js.
- Designed asynchronous workflows using Celery for background processing, notifications, and scheduled tasks.
- Worked with PostgreSQL, MySQL, and MongoDB for application and AI-related data storage.
- Implemented semantic retrieval and knowledge-grounded responses using RAG and vector search.
- Containerized applications with Docker and managed production deployments using AWS EC2 and Nginx.
- Collaborated through Git-based development, code reviews, debugging, and Agile development practices.

PROJECTS

AI Local Expert

Tech Stack: Python • React.js • Nest.js • OpenAI • LangChain • RAG • MongoDB • Docker

- Built an AI-powered website chatbot capable of answering questions using business-specific knowledge.
- Designed a RAG pipeline to retrieve relevant information and ground LLM responses in business data.
- Implemented semantic/vector search for retrieving relevant documents and improving response relevance.
- Developed prompt strategies for maintaining conversational context and generating business-specific responses.
- Integrated OpenAI GPT models with LangChain for LLM orchestration and application workflows.
- Used MongoDB for conversation history and knowledge storage; Dockerized the application for deployment.

Kashwork

Tech Stack: *Python • Django • DRF • Nuxt.js • PostgreSQL • Celery • Docker*

- Developed a full-stack e-commerce platform with product management, orders, and payment workflows.
- Designed REST APIs using Django REST Framework for the Nuxt.js frontend.
- Implemented asynchronous processing with Celery for notifications and background jobs.
- Designed and integrated PostgreSQL-based application data models and containerized backend services using Docker.

Negls

Tech Stack: *Python, Django, MongoDB, Celery, WebSocket*

- Developed an employee feedback tool with real-time communication using WebSockets.
- Used Celery for asynchronous notification delivery and task scheduling.
- Stored and queried feedback data using MongoDB.

EDUCATION

Master of Computer Applications (MCA)

Dev Bhoomi Group of Institutions, Saharanpur | *June 2022*
